- Grading the design for all sizes e.g., 0 to 14.
- Making markers for plot according to their size ratio.
- Printing and plotting the marker for record purpose and for cutting.
- Giving the CNC file for the cutter with GMS.
- Merging the different sizes according to the ratio for better efficiency.
- Coordinating with HOD Master, CNC & cutting masters to deliver very efficient marker.

Projects:

Dashboard.
- I have created ReactJS Dashboard using d3.js for charts, charts data updates on select dropdown and button click events.
- I have also used Material UI for Theming and style purposes.
- It is completely responsive for devices such as Desktop/Laptop/Tablet/Mobile.
- Link: https://yusuf-dashboard-react.netlify.app/

Best Todos App.
- I wanted such a Todo app, so I built one. Built using Next.js with TailwindCSS & TypeScript.
- Used useReducer and Context API for state management.
- Link: https://best-todos-app.vercel.app/

Clothes Store.
- I Developed Clothes Store Using HTML5 & SCSS.
- Created Custom Variables, Mixins and used partials & import.
- The effect of Featured Products hover & Slide effect on Hero/Banner section is working. Using SCSS & CSS3 animations, JS or jQuery is not used.
- Link: https://yusuf0786.github.io/clothes-store/

Alchemy.
- I created this website using Bootstrap 5 framework of CSS.
- Customized Bootstrap Navigation and Bootstrap Carousel.
- Link: https://yusuf0786.github.io/Alchemy/

Cascade.
- I Have Built this on CSS Grid with HTML, jQuery and JavaScript.
- Link: https://yusuf0786.github.io/cascade-grid

Education:
- Course in Frontend Web Development at Hindi Tech Tutorial, 2020.
- Completed 50+ Hours of Front-End Web Development Online Course by a Professional Web Developer Rajdeep Dhakad at Hindi Tech Tutorials.
- BMM, Mumbai University, 2020.
- HSC, Maharashtra Board of Secondary and Higher Secondary Education Pune, 2016.
